# Instant Digital Smart Receipts with Slyp

Slyp Smart Receipts delivered directly into the Weel expense management app the moment a purchase is made at a Slyp-enabled merchant.

Trusted by Australia’s fastest growing businesses

## Receipts, meet technology

Never chase your staff for receipts again.

- Smart Receipts are generated the moment a payment is made.
- Product details, returns policies and contact information at your fingertips.
- GST and all line-items are recorded with 100% accuracy direct to the Weel expense management app.
- Smart Receipts automatically export into Xero, MYOB and QuickBooks.

## Digital receipts on auto-pilot

When a staff member makes a payment at a registered merchant, an interactive smart receipt automatically attaches to their expense report. Say goodbye to blurry photos and follow up emails.

## Record GST with 100% accuracy

Taking a photo of your receipts is good. But when you can capture the exact GST for every line item without needing to take a photo or check the transaction. Well, that’s great.

## Save time and the planet

Every day, the average person receives 2-3 paper receipts. This means we destroy over 4,000 trees every day. Smart Receipts make paper receipts a thing of the past. Who knew bookkeeping could help save the planet?

## Straight-through Slyp receipts

Integrate Weel with your accounting software, and watch as your Smart Receipts appear the moment a payment is made.
