What is a virtual corporate card?

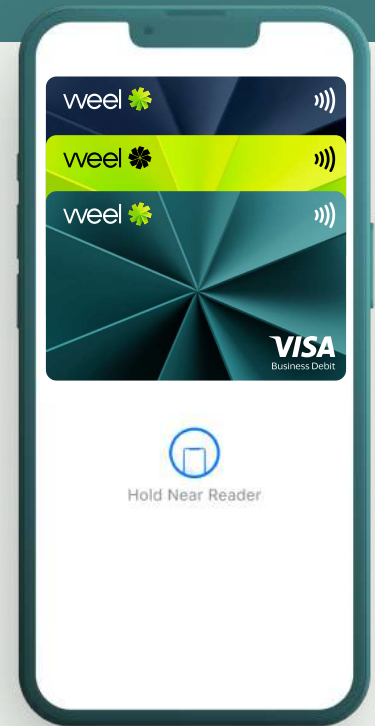

How it works

Weel's virtual cards work the same way plastic cards do, the only difference is that the virtual cards live on your phone instead of in your wallet.

The Weel virtual Visa Business Debit is reloadable and can be used anywhere online or in-store that Visa is accepted — you just need to have funds in your Weel account.

Pay online or instore with your phone.

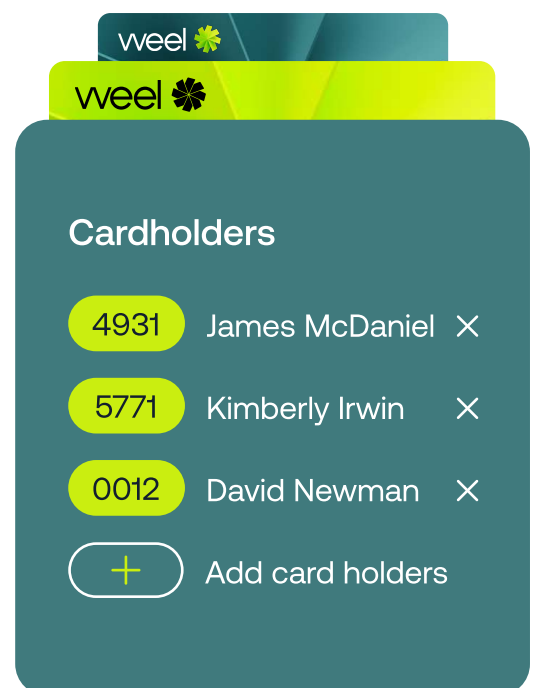

Instantly pause and issue cards

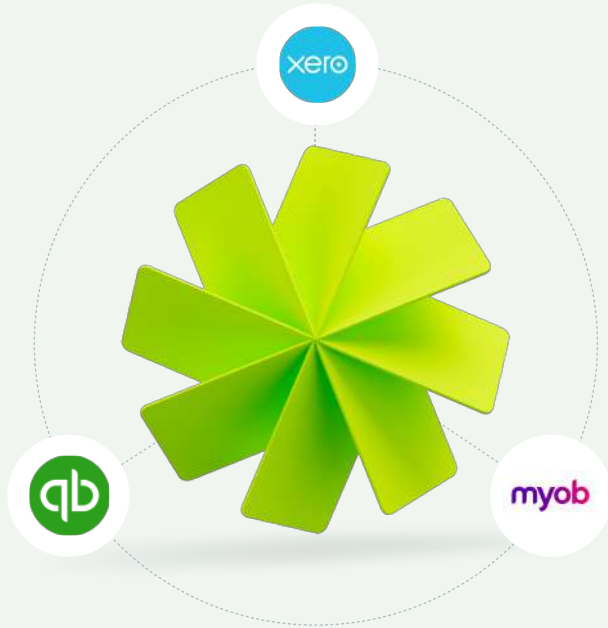

No time consuming paperwork or bank visits needed to issue cards.

Protected by Visa, Apple Pay and Google Pay's fraud systems.

How do integrations work?

Seamless financial tech

Integrating Weel with Xero, MYOB or QuickBooks eliminates manual data entry with all transactions automatically imported into your accounting software for you.

Set-up doesn't require a technical consultant

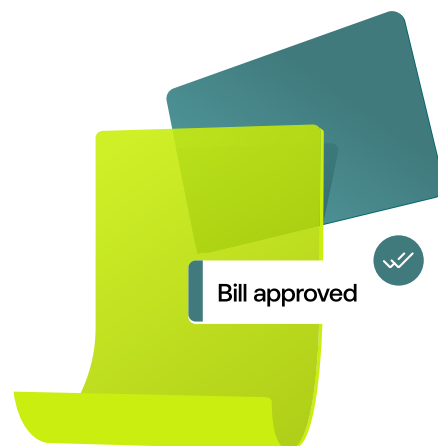

Data syncs in real time

GL codes and tracking categories auto-import

Automatic bill payments

With Weel, you can extract, code, approve and pay bills from one place via EFT. Automatically!

Client Spotlights

Michael Hill

Michael Hill saves 870 hours of in-store expense admin with Weel.

“With the support of Weel’s implementation team, we rolled out 200 virtual cards in the first day and Weel support handled all questions as they arose.”

Troocoo

Recruitment firm, Troocoo, saves 2 days a month of finance admin by using Weel.

“The biggest selling point for Weel in my eyes is that it’s really quick and easy to use, and it removes duplication.”
